Experience

Software Developer, Multiline Contact Center

May 2026 - Present

Montevideo, Uruguay

- Provide production support for over 12 business-critical applications serving 5 corporate clients, resolving over 5 incidents a week and cutting average resolution time from 4 hours to 40 minutes.
- Develop and ship features for the internal PHP and Laravel systems that support the contact center's daily operation, from requirements analysis through deployment.
- Upgraded 4 applications from Laravel 8 to 13, covering over 30 controllers and 100 views, and wrote PHPUnit tests across their modules to prevent regressions.
- Deploy changes across development, staging and production, ensuring quality through peer code review.

Sales and Operations, eDrinks

Apr 2024 - May 2026

Montevideo, Uruguay

- Managed daily invoicing and sales records, cutting incident response time by 35%.
- Coordinated restocking with over 10 suppliers, reducing stock shortages by 20%.

Education

Computer Science Technologist, Universidad Tecnológica del Uruguay (UTEC)

2024 - Expected 2027

Buceo Campus, Montevideo

Coursework: Software Engineering, Advanced Programming, Data Structures and Algorithms, Application Programming, Databases, Operating Systems, Computer Networks, Discrete Mathematics and Logic, Computer Architecture, Probability and Statistics

Bachelor of Music Performance - Classical guitar, Universidad de la República (Udelar)

2023

EUM Campus, Montevideo

Projects

- **ATS Boost** - Designed and deployed an LLM-integrated web app that tailors a CV to any job posting's keywords in under 10 seconds, built with Laravel, Livewire and SQLite. Over 200 CVs processed in the last month, 2026.
ats-boost.com
- **Memory and statistics engine** - Built memory, sorting and statistical analysis routines in Assembly and C, 2025.
